

## I.Ceram presents its Ceramil® technology during VivaTECH 2018 in Paris

I.Ceram, specialized in biocompatible ceramic loaded with active molecules for skeleton delivery, participates in the 3<sup>rd</sup> VivaTechnology exhibition, dedicated to innovation which took place in Paris from 24 to 26 May 2018.

Highlighted on France-Biotech's booth, I.Ceram was in the heart of the first Medtech hub dedicated to health innovations, which will shape the medicine of tomorrow. During this meeting, the I.Ceram team presented Ceramil® technology, which offers a new therapeutic option in the treatment of bone infection and bone metastases, thanks to complete biocompatibility and its ability to release active molecules locally.

This international convention dedicated to innovation and startups, welcomed more than 100,000 visitors, more than 1900 investors, 125 represented nationalities and 9,000 startups over 3 days. André Kerisit, I.Ceram CEO and Eric Denes, Scientific director, met more than 200 people among which many actors of innovation, healthcare professionals such as Sanofi, BPI France, surgeons and also health journalists.

With more than 13 patents, I.Ceram confirms with its participation to this international event, its innovation capacity and its intention to bring to surgeons a disruptive medical solution for hard to treat diseases, such as bone infection or bone metastases.

You can listen to Eric Denes' Interview broadcasted on 2018, May 28<sup>th</sup> during the radio program "La vie devant soi" on [Europe 1](http://Europe1.com) (in French).
